

UIS DST™ Dig Skip Tip

Excavator Attachment for safe containment and removal of site spoil

A unique new and innovative approach to the way site spoil is handled throughout the utilities and groundworks sectors.

UIS Ltd are proud to present DST™ dig-skip-tip. A new, exciting and innovative product for utilities and groundworks operations, DST™ provides fresh approach to the way normal digging operations are carried out by removing the need for excavated material to be tipped and stored around the dig site during works.

Quick and easy to attach, DST™ fits all mini-excavators, requires no extensive user training and can be easily operated by one man. DST™ dig-skip-tip, features an all terrain wheel system allowing access to even the most difficult of site areas. Utilising DST™ site spoil is immediately & safely contained and then removed from the dig site, keeping surrounding areas clean and fully operational without the need for heavy manual barrowing in tight spaces, reducing the risk of slips, falls or other accidents.
